ROSA MULTIFLORA The Miracle Living Fence

2H1—Protect and beautify your property. A cheap practical fence that grows so dense no person or animal can get through.

The plants grow 6 to 8 ft. tall and 5 to 7 ft. wide, are tough and fast growing. Covered with a multitude of white flowers in spring; loaded with attractive red fruit in fall and winter which provide food for wild life.

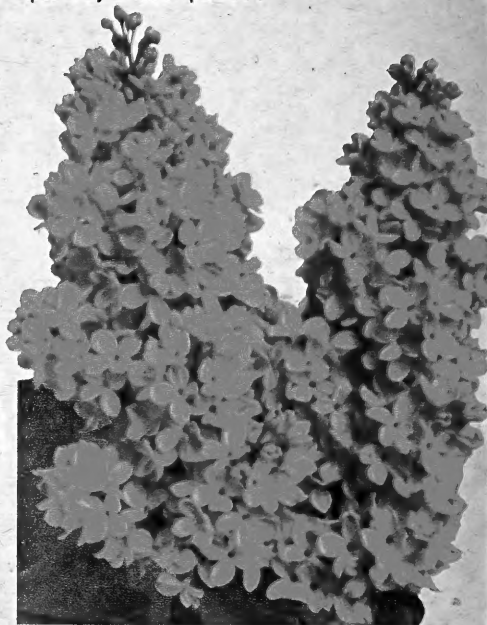

Recommended by U. S. Soil Conservation service for livestock farm fence and for factories, parks, estates, institutions, residences, etc. that wish to keep animals and trespassers off their property. Present recommendation by U.S.D.A. are to plant 1 ft. apart in a single row for stock tight fence. Ornamental hedges can be planted 18 inches

apart and kept trimmed to desired height. Trial fences planted throughout east, west and south have proven successful. North of Milwaukee there is danger of winter injury. The general use of rosa multiflora is just beginning but its value is proven for cheap fence, game management, property protection, windbreaks and erosion control to soil and crops, will last for generations.

Spring Hill's Giant BLUEBERRIES

New, giant fruiting hybrid varieties introduced by U. S. Dept. of Agriculture. Greatly improved for sweet, mild flavor, huge size, large crops and strong, stately looking plants. Lovely pink flowers in spring are followed by big clusters of berries often large as grapes. The fruit ripens from mid-July to late August. Plant no less than two varieties for pollination. Blueberries require acid soil, use peat moss or decomposed vegetable matter mixed with aluminum sulfate if soil is sweet. Plants last a life time. Easy to pick, no thorns. Beautiful for landscaping.

WEYMOUTH— 8F12 —Improved new, early ripening hybrid.

STANLEY — 8F14 —Excellent new, midseason ripening hybrid.

PEMBERTON — 8F15 —Recommended, new late ripening hybrid.

Hardy Amaryllis Halli

(See color picture opposite page.)
10B8 — (*Magic Lily*) — The only perfectly hardy amaryllis grown. Botanically called *Lycoris Squamigera*. Surprisingly beautiful with clusters of 5 to 12 large opalescent pink blooms on a stem. The attractive foliage dies in July. A few weeks later as if by magic the flower stems seem to pop out of the ground and grow rapidly to a height of 2 ft. Easily grown in sun or partial shade. Bulbs multiply each year. *Big, large blooming size bulbs at reduced prices. 45c each; 3 for \$1.15; 10 for \$3.75. Jumbo size, 60c each; 3 for \$1.50.*

Dream Lily

(See color picture opposite page.)
10B9 — (*Phyllippenuse Formosanum*) — Exceedingly popular because of its enormous, fragrant, trumpet-shaped blooms which are at their best in hot mid-summer. The creamy-white flowers, with transparent green throats, resemble Easter lilies in form but are much larger. The delicious fragrance and fresh beauty of this wonderful new lily will add greatly to the beauty of your summer garden. Hardy bulbs multiply. *Imported 5 to 6 inch bulbs. New reduced prices, 55c ea.; 2 for 89c; 6 for \$2.45.*

Rosy China Lily

(See color picture opposite page.)
10B10 — (*Speciosum Rubrum*) — Considered by many as the loveliest of all pink lilies. Sparkling bright pink petals edged white and sprinkled with red dots. The strong 3 to 4 ft. stems produce an abundance of blooms from July into autumn of good size, great substance and depth of color. One of the most used and finest lilies for cutting. *Select 6 to 8 inch bulbs, 60c each; 3 for \$1.45; 6 for \$2.65.*

FALL ROSE PLANTING INSTRUCTIONS

Plant roses this fall for earlier and more abundant blooms. All roses offered are large, 2 yr. Northern Ohio field grown plants. All are everblooming and will flower continuously for you from next May until early winter. Follow simple directions for healthy plants and abundance of blooms. Plant below the bud or where branches start. This is usually 2 inches deeper than soil marks where they have grown in the nursery.

After planting cut off top of rose plants 10 to 15 inches above soil. Then mound earth 10 to 18 inches high (as shown in picture). Cover with leaves, straw or coarse material to keep winter rains from washing soil. Remove or level off mound of earth next spring when new growth starts. Roses cared for in above manner give greatest satisfaction and from our experience you can produce more prize winning blooms. Plant roses in beds 2 ft. apart in alternate rows.

WE GROW THE EVERGREENS WE SELL

HOW TO PLANT EVERGREENS—Plant evergreens immediately upon arrival so they do not dry out. Dig hole 8 to 10 inches larger than the ball of earth or root spread if wrapped in peat and shipped bareroot. Set evergreen 1 to 2 inches deeper than soil marks on the trunk. Fill hole half full of rich top soil, firm well, then water.

EVERGREEN DIGGING NOTICE—All evergreens for shipping will be fresh dug from our field bare root and wrapped in moist peat. Present day delivery and packing costs make it too expensive to ship balled and burlapped. Our experience shows that bare root evergreens deliver better and grow just as well. Balled and burlapped evergreens available at nursery.
